AGRICULTURAL PROBLEMS.

A NEW THEORY OF LAND FERTILIZATION

CHEMISTS TO FORM A NATIONAL SOCIETY-THE FIRST SESSION OF THE MAIN BODY OF SCIENTISTS AT WASHINGTON TO

> BE HELD TO-DAY. TRY TELEGRAPH TO THE TRIBUNE.

Washington, Aug. 18 .- The registration to-day at the Arlington Hotel of 300 members of the American Association for the Advancement of Science indicates both an earlier gathering than usual of this important body recent years. and perhaps the largest meeting of Most of the early arrivals were attracted by the numer meetings of associated and affiliated societies, so eral of which meet this year for the first time. While the association proper will not convene until tomorrow, the last week has been filled with meetings of the American Society of Microscopists, the Association of American Agricultural Colleges and Experiment Stations, the Association of Official Agricultural Chemists, the Society for the Promotion of Agricultural Science, the Conference of American Chemists and the Association of Economic Entomologists. The three latter have been in session yesterday and to-day.

The American Chemical Society, incorporated and settled in New-York, also held meetings not announced in the ordinary circular of arrangements. The purpose of the conference of chemists was the formation of a National society. The following associations joined in this conference: The American Chemical Sortety, the Washington Chemical Sortety, Washington Chemical Society, the Association of Official Agricultural Chemists, the Cincinnati Chemi-ral Society, the Brooklyn Institute Society, the Franklin Institute, the Association of Manufacturing Chemists and the Louisiana Association of Sugar Chemis's. The representatives of these societies are empowered simply to discuss and agree upon a plan of organization, which they are to report back to the associations they represent for ratification. The conferrees, however, exno doubt that any plan they may agree to will meet the approval of the bodies represented in the con-

The Society for the Promotion of Agricultural Science is a select body of forty experts, and the papers read are usually of a high order. The meetings are usually ended on Tuesday, but this year five papers will remain for a morning session to-morrow. To-day's programme included "An Additional Note on Potato Rot," by T. J. Burrill; "Olive Oil Adulterations," by L. Paparelli; "Arscule and Copper as a Fungicide and Insecticide" and "Results of Treatment of Respherry Anthracnose," by W. J. Green; "Soil Extract in Relation to the by W. J. Green; "Soil Extract in Relation to the Development of Tubercles in Clover Roots," by R. C. Kedzie; "A Symposium on Matze," by G. C. Caldwell; "The Description of Varieties of Strawberries and Rasp-berries," by W. J. Beal; "The Relative Dates of Flowering of Some Varieties of Prunes, and Their Importance to Practical Plum Growers," by T. V. Munson; "A Physiological Basis for the Comparison of Potato Production," by J. C. Arthur; "Soaking Seed Beans to Check Anthracnose" and "Eastern and Western Weeds," by B. D. Halsted; "Results of Some Experiments Made in 1891 in the Treatment of Plant Diseases," by B. T. Galloway. The following papers were by invited guests, not members of the society: "Fungicides for the Apple Scab," by L. R. Taft; "Conditions Which Modify the Appearance of Parasitic Fungi in Plants," by L. H. Pammel; "Energy us a Factor in Agricultural Science," by M. Miles.

Decidedly the greatest interest was manifested in and

the most animated discussion followed the related papers of E. W. Hilgard on "Soil Examination" and "Soil Maps," and of Mr. Whitney on "The Structure of Soils" and "The Circulation of Soil Moisture." The logical outcome of these two papers is, indeed, nothing less than a revolution in methods of fertilization and of enovating worn-out soil. As Mr. Whitney expressed it. agricultural chemistry has reached its goal and further progress must be in the line of agricultural physics. s means that stericity is not due to lack of chemical elements or plant food, but to change in the molecular condition of the soil in reference to retaining and transmitting moisture. The true theory of fertilizers is that they change the mechanical condition of the soil, rather than that they supply plant food. The most favorable proportion of water for p'ant life s 6 to 12 per The finer the particles of soil, the more retenuve of moisture it is, and hence the greater is its fertility. Increase in relative power is enormously apid as the distance between particles of soil de creases, being in the ratio of the fourth power of this distance. Thus by doubling the diameter of an aperture, through which water is to pass, the velocity its motion increases sixteenfold. Salt and lime have the effect of diminishing the distance between particles, rendering the soil, as it were, more springy and thus increasing its fertility. The superficial area of particles in a cubic foot of soil, Mr. Whitney calculates, will range between 10,000 and 15,000 square feet. The great practical problem for the farmer, in dealing with barren soil, is to raise this area as nearly

as possible to the maxin ater management is the problem of the future. He indorsed the new theory of fertilization as a physical rather than a chemical process, and added that trees t least require no "plant food," but only proper conditions of soil and moisture. Irrigation and drainage will almost work miracles. The worst form in which water can be applied to the soil is by rainfall. He incidentally expressed entire lack of faith in the effort

cidentally expressed entire lack of faith in the effort to induce rain by artificial means, for which Congress made a small appropriation, which is now being used in experiments to ascertain whether rain can be thus brought down at pleasure.

Of the addresses before the American Association for the Advancement of Science to-morrow, two at least will Command general attention, that of the retiring president, Professor Goodale, of Harvard University, on "Fruit of the Future," and that of Vice-President James, of the University of Pennsylvania, on "The American Farm."

Members elected by the council at this meeting include Miss Clara I. Altkin and Miss Helen J. Altkin, of Brooklyn; Miss Maude Fortescue and James P. Hali, of New York.

of New York.

The American Geological Society will meet here next
Monday and Tuesday, and the International Geological
Congress will hold its fifth meeting, being the first
ever held in America, August 26 to September 1.

THE PROBATING OF MRS. SEABLES'S WILL.

NO APPEARANCE YET ENTERED BY TIMOTHY

HOPKINS, THE ADOPTED SON. Boston, Aug. 18.-There can be no hearing on the probating of the will of Mrs. Mary F. Hopkins Searles, of Methuen, until the required publication of the citation has been made. The will is to be presented for probate at Salem, Mass., on September 7. There can be no appeal until there had been a decree. The only thing that possible contesting parties may do is to enter their appearance. As yet no appearance has been entered by Timothy Hopkins, of San Francisco, although it is understood that he will be present at the

San Francisco, Aug. 18 .- John A. Boalt, the lawyer, has started East to join Russell J. Wilson and will act with him in contesting the will of Mrs. Hopkins Searles.

C. P. Huntington, president of the Southern Pacific Railroad, yesterday denied that he had made any overtures to Edward P. Scarles or to any one else for a settlement of the Hopkins-Searles will controversy. It had been reported that \$5,000,000 was to be paid to Timothy Hopkins, the adopted son of Mrs. Hapkins-Searies, who was disinherited by her will, the payment to be made for the settlement of the case out of the courts. Mr. Searles, it was asserted, was opposed to Mr. Huntington in the management of the Central Pacific, and hence Mr. Huntington had encouraged Tim

othy Hopkins to contest the will. Mr. Huntington said he did not think the will would be contested, and that the reported negotiations were entirely without foundation. "Mr. Scaries and I occa-sionally scold at each other across the table," said he, "but we always vote together."

THE ODD FELLOWS AT KINGSTON.

Kingston, N. Y., Aug. 18 (Special).—The city is througed with Odd Fellows from all parts of the country. The streets are profusely decorated in honor of the visitors. The session of the Grand Lodge began this morning at the Opera House. Mayor Kraft de-livered an address of welcome. He could not follow ancient custom by delivering the keys of the city. he said, because there were no longer any such keys, but the latchstring could be pulled with freedom. Grand Master Spooner responded. Mr. Spooner in his annual report reviewed the work of the year. He had visited every district in the state. The committee were announced by the grand master. The Grand Lodge degree was conferred upon 238 members. The following efficials of the Grand Lodge of Connecticut are in attendance: Grand Master Judge George H. Cole, Deputy C. B. Ware, Warden W. H. Marigold, who is Mayor of Bridgeport; Past Grand Master W. H. Cornley, Past Master and Representative Frederick S. Hunt. Many other prominent persons are in attendance.

The old Senate House in Clinton-ave. has been visited by crowds all day. The meetings of the Grand Lodge will be continued to-morrow.

long been regarded as an oracle on Western topic among historical specialists, and was for about thirty years the head of the Wisconsin Historical Society. He is the author of many historical works.

A BRILLIANT BALL AT NEWPORT.

A HANDSOME ENTERTAINMENT IN HONOR OF MISS MAUDE WETMORE'S ENTRANCE INTO SOCIETY.

Newport, R. I., Aug. 18 (Special).-Chateau-sur-Mer, the palatial home of ex-Governor and Mrs. Wetmore, was the scene this evening of a ball which in many respects outrivalled most of the similar occurrences which have preceded it this summer. villa is a magnificent palace by the sea, built of granite, with massive pillars and spacious plazzas. Mrs. Wetmore is a charming hostess at all times, and her entertainments, whether a grand ball or an after-noon reception, are of the highest order. The ball Mande Wetmore, second daughter of the host and hostess, whose entrance into society is thus formally made. Miss Wetmore received with her mother, and with Thomas F. Cushing led the cotilion. The favors were miniature coronets, set with costly stones, for the ladies, and fleur-de-lis with jewels to match, for the men;

For the first time, ex-Governor Wetmore allowed the florist to add to the permanent decorations of the house, which are among the handsomest in Newport. Many novel features were introduced. The decorations were confined chiefly to the magnificent ballroom. It is unusually large, of great height and is painted pale lavender and green, with panels of cupids and flowers in white composition. Beneath these were cuplds and hung garlands and pendants of natural flowers, in white and blue, caught up with pale pink satin ribbons tied

The two large mirrors were also hung with garlands and pendants tied with ribbons of the same color, the ors being opposite each other and repeating in reflection the decorations. On one mirror were deli cate tracing of pink roses and green, and on the other creamy yellow perle roses. On either side of the mirrors were massive bronze candelabra, draped with vines of passion flowers in bloom. The mantles were draped with red passion flowers and maldenhair ferm

This completed the decorations inside the house, ex-cepting palms and potted plants, which were piaced here and there in convenient places. On the piazzas and in the tent erected nearby the artist had arranged his decorations to resemble a veritable garden, and his efforts were eminently successful. At one end of the plazza was a large pond containing lotus and nymphal plants in full flower, from the hot-houses attached to the place. The sides of the plazzas were panelled with wild grasses, rushes and palms; the ceilings were hung with oak boughs and the pillars were massed Japanese maize, rising from beds of hydrangeas. At one end of the piazza was fitted up a Japanese room. with umbrellas and floral decorations, affording a cool retreat for the dancers.

The supper was served by Pinard in the large tents upon small tables. The grounds were lighted with fairs being made as light as day. The ball was attended by the leading people in society, and in spite of the fact that there have been many brilliant and successful balls in Newport, none of this year has excelled the one to-night. lamps and large lanterns, the approaches to the door

A WEDDING.

Harry S. New, the son of John C. New, United States Consul-General at London, and Miss Catherine McLaen were married last night at the home of Mr. and Mrs. Frank McKee, No. 356 West One-hundred and eighteenth-st. Mr. New is a well-known Western newspaper man, and now fills Elijah Halford's old position on "The Indianapolis Journal." He has worked himself up from the bottom, having begun as a reporter ten years ago. While filling this position he met Frank McKee, who wrote at that time for "The Louisville Courier-Journal," not yet having become a theatrical manager. They became close friends, and Mr. and Mrs. McKee therefore insisted on having the ceremony performed at their home. Mr. New is thirty-two years old and was married to a Miss Milligan, of Chicago, in 1880. She died three years later. He is a member of many clubs in Indianapolis, is a skilled athlete, and has a host of friends

here and at his home. The bride comes from a Detroit family, and her father is a prominent architect in that city. She went on the stage some time ago, and for the three years up to last April she played in Miss Kate Castle-Faust Up to Date" company. Since then she has not appeared in public. She is twenty-two She is twenty-two ment has been known to the intimate friends of both for some time, but was not made public. The wedding was private because Mr. New's near relatives are all in Europe. A pleasant incident was the meeting of the minister, the Rev. Benjamin B. Tyler, of the Church of the Disciples of Christ, and Mr. New. It was found that the first sermon that the minister had heard when a boy was one preached by Mr. New's grandfather.

The ceremony was performed in the drawing-room of the McKee house and was simple, there being no b maids, maids of honor, best men or ushers. Mr. McKee gave Miss McLaen away. She wore a gown of heliotrope corded silk, combined with brocaded velvet with chiffon puffing at the neck and sleeves. It was trimmed with velvet and lucc. She carried a bouquet of white roses.

Mrs. McKee had arranged a dinner, which was served immediately after the ceremony. The table was decorated with white and red roses, and the company had a most enjoyable time. The only ones present were a most enjoyable time. The only ones present were the mother of the bride, Miss Burton, a friend of Miss McLaen from Detroit, Miss Isabel McKee, B. M. Dusher, J. T. Brush and Charles O'Hoyle, all of Indianapolis, and Mr. and Mr. McKee.
Mr. and Mrs. New went on board of the steamer City of Paris last night and will sall for Europe this morning. They will call first on Mr. New's father in London, and afterward will visit the sisters of Mr. New, who are at school near Paris. They propose to return to America on October 1, and will then live in Indianapolis.

ANOTHER BAND AT THE GARDEN.

F. N. INNES AND HIS MUSICIANS BEGIN THE CONCERT SEASON.

Theodore Thomas's orchestra is justly famous, in its way, but II never produced, by its most united and serious efforts, so much "Tarantara Tzing Boom" as Innes's Band. Innes's Band began a series of concert at the Madison Square Garden last night, on the same platform that Mr. Thomas and his orchestra had left two nights before. The methods and the execution of the band are distinctly of the character com-monly described as "popular." The musicians are not content with simply playing their instruments; they also sing and whistle and shout. All this pleased the audience and there were frequent encores. F. N. Innes, the leader of the band, has been chiefly known hitherto as a trombone soloist. He played one of his own compositions last night to the evident pleasure of his hearers. Carl Streltmann and Miss Annie Louise Tanner were also warmly applauded for their singing. and Mr. Streitmann was obliged to repeat the "Stella" song from Suppe's "The Search for Happiness," otherwise known as "Clover." There was a fairly goodsized audience present. The programme for the con-

TAKING THE BLACK VEIL.

Baltimore, Md., Aug. 18 .- At the Convent of Notre Dame in this city to-day thirty-three young novices were invested with the black veil in the order of the Sisters of Notre Dame. These young ladies were re-ceived on probation two years ago, and the investiture of the black veil is their second step toward taking final vows, which will be made at the end of seven

SPOONS AND FLAGS AND PHOTOGRAPHS.

There was a spirit of demonstrative joyousness noticeable at Palmer's Theatre last night on account of the 100th per formance of "The Tar and the Tartar." The decorations were lavish and tasteful, consisting of flowers and plants, were lavish and tasterus, consisting or howers and particular crimison and gold haugings, flags, pennants, shields, etc. Every seat was sold twenty-four hours in advance, and when the certain rose all the standing room had been sold too. The audience was enthrealastic in proportion to its size and enjoyed everything and applicated everything. After the second act a firshilight photograph of the audience was taken. It was done quite as if it were an occurrence of every evening. The curtain was raised and the photograph of the second act and the second act as a second act as a second act as a second act and the second act as a second ac of every evening. The curtain was raised and the pho-tographers were seen setting ready to take the picture. Not a word was said about what was to be done, but when Not a word was said about what was to be done, but when it was least expected there was a blinding flash of light on each side of the stage. It was all done then, and the curtain was put down again. The photograph was taken by Pach Brothers. The souvenir that was distributed has already been described in part. It was a teaspoon of solid light of the handement or organization. The bowl AMAN C. DRAPER STRICKEN WITH PARALYSIS.

Madison, Wis., Aug. 18.—Lyman C. Draper has iffered a stroke of paralysis which leaves him entirely properties. The properties of the paralysis which leaves him entirely controlled in part. It was a respons of solid allver, with a handsomely ornamented handle. The bowl was lined with gold, and was inscribed "look was lined with gold, and was inscribed "look performance," Tar and Tartar, 18th Aug., 1891." There suffered a stroke of paralysis which leaves him entirely were also souvenir programmes, which will be used for the helpless and which is likely to prove fatal. He has reat of the week.

THE MINEOLA WINS.

RACE FOR THE CHERRY DIAMOND CLUB'S GOLD CUP

A WELL-SAILED CONTEST OFF NEWFORT-AN-OTHER RACE BETWEEN THE MAR-GUERITE AND THE HURON

IBY TELEGRAPH TO THE TELBURE. I Newport, R. I., Aug. 18.—The Fife cutter Jessier received a most remarkable defeat at the hands of the Burgess bont Mineola to-day. It was the the Burgess bont Mineola to-day. first of the series of races for the gold cup offered by the Cherry Diamond Yacht Club. The Cherry Diamond Yacht Club, as every one knows, or should know, is the yachting department of the Manhatlan Athletic An attempt to sail a race for the golden cup was made off Larchmont early in the season, but was ot successful, owing to the absence of an important stake-boat. However, the race was sailed to-day-in a stendy wind which blew up from south-southwest and over seas which really gave no chance for a perfect test of the yachts. The only starters in the race were the Mineola and the Jessica, which boats had competed, in the first instance, in a "fizzle" race off There is a regutta committee apperts ining to the Cherry Diamond Yacht Club, but so far this committee has not been visible to the naked eye and Commodore Summers was his own regatta com mittee and official staff at the race to-day. It is necessary that this gold cup be won three times in order that a yacht may hold it in perpetuity.

When the Jessica and the Mineola came down to the start at Brenton's Reef lightship to-day the wind blew light from the south-southwest, and those long swell which always course about the yellow hull of the lightship and break in shining foam on the crags of Beaver Tail were rolling in from out beyond where the onely white watch-tower on Point Judith marks the entrance to Narragansett Bay. The Mineola and Jessica lay off and on above the line between the stakeboat and the lightship, waiting for the signal to start. There was a private match of \$250 a side between Mr. McDonough and Mr. Belmont, and this prize, the golden cup and, more than all, the glory of a victory nerved each to do his best in the day's race. It was the intention of the Jessica to cross the starting line pointing-for no boat that ever sailed can point higher than the Jessica-to have overlapped the Mincola, and so to have gotten a good lead at the outset of the race. But there are few more astute sallormen that own and sail yachts than August Belmont, and he, sitting with his inevitable straw hat drawn tightly down across his brows, squatted by the lee rigging conning the ship. while young "Hank" Haff stood at the tiller. gether, the combination was victorious. Mr. McDouough, of the Jessica, got his bout across the line in good shape, with his sailing master, Captain Harvey, at the helm. The Jessica was not, however, able to accomplish what she had designed, and when the yachts were fairly across the line, standing for the Narragansett shore, the Mineola was to windward, with the Jessica under the lee quarter. The time of the starts was as follows: Jessica, 11:51:35; Mineola,

the Jessica much out-pointed the Mincola. So the the utmost purple rim of the ocean, the Cherry Diamond flag was bobbing about on the stakeboat, awaiting the rounding of the yachts. Every now and then the Mineola, in order to hold her wind and position, would be obliged to tack, and when she tecked the Jessica followed her. The Mineola never sailed better, and the Jessica never sailed worse. Off Point Judith the Mineola bore down for the mark and was able to fetch it on the port tack; a slight shift of the wind enabled her to do this, otherwise she would have been obliged to make another leg before rounding. The Jessica held her wind and came down to the mark also, but by that time it was a hopeless race for her. Both yachts before this had set their club-topsails, having started under working topsails, in anticipation of a blow, the sky giving every indication of strong But the wind came not. wind. ten miles from so that the whole course was twenty miles, ten dead to windward and ten running. The Mineola has always beaten the Jessica in running, so when the white sloop rounded first, the race was gone beyond redemption. The time of the yachts in rounding were as follows: Mineola, 2:11:44; Jessica, 2:16,

From the outer mark to the finish it was ession of two, and the Mineola spinnakers were broken out as soon as the yachts rounded and lively work was done on both boats. Nothing can be said of the run back, except that the sun was bolling hot and the lead of the Minsola was not decreased. The time of the race was as follows:

The Mineola thus w

\$90 sweepstakes, and \$250 private match While the race between the Mineola and Jessica was going on the schooner Marguerite and the cutter Huron were sailing a private match of their own. They were started half an hour after the regular racers, and from the start to the finish the schooner held the cutter. The Huron made a poor start. Both broke out libtopsalls as they crossed the line, and later in the race the Marguerite set her fore-topsall. It was rather remarkable to see a schooner beat a cutter in windward work the way the Marguerite beat the Huron; in fact, the Huron had not a show for the victory from the start. The course for these racers was the same as that for the 46-footers, and they used the same outer mark. The time of the Huron and Marguerite, 2:43:46; Huron, 2:54:45. From the outer mark to the finish, at Brenton's Reef Lightship, the two yachts held about the same relative position. They salled without time allowance, and their time on the course was as follows: the start to the finish the schooner held the cutter

Name. Start Finish time, h.m.s h.m.s time, h.m.s The second of the series of the race for the gold cup will be sailed to morrow, as will also a special race between the Margaerite and the Iroquois.

THE TRAMP DIES FROM HIS WOUNDS.

shot in West-st. Sunday morning, died last night at 516; Horace Greeley, No. 571; and Hans Powell, No. the Chambers street Hospital. Further evidence, was 633. obtained by the police of the Church-st. station, which shooting. Yesterday afternoon, Patrick Smith, of the this county of the law of 1888, which required the will probably fasten on Michael Degnan the mysterious shooting, resterday atternoon, Patrick Smith, of the Eclipse Lodging-house, entered the station-house and proper authorities in every county to provide the time of the shooting, he and a friend were walking up veterans of the war and their families, or the families told_Seregant Heap that shortly before 3 o'clock, the West-st., toward Robert Ecnest's hotel for a glass of

As they passed Dey and West sts. they heard one of a group of three men say: "We'll lay for him here." One of the men was tall, the other shorter in stature. Sullivan and Degnan were brought up from their cells and smith in the rear room of the station-house pointed out Degnan and said he resembled greatly the man he heard say "We'll lay for him here."

The prisoners were returned to their cells, and smith, continuing his story, said he and his friend, whose name he could not recall, passed on to the barroom, where they had several drinks. Suddenly there was the report of a pistol. Smith and his friend rushed toward the door leading to the street, but it was locked. When the excitement was over, the to do so, and the final decision of the organization proprietor unlocked the door and passed them out. Smith knew nothing of the result of the shooting until he read the reports in the papers.

Degnan and sullivan were rearraigned at the Tombs

Court yesterday. Sullivan was discharged and Deg-nan was remanded until to-day.

William Stripp, twenty-seven years old, of No. 95
Washington-st., was arrested last night on suspicion of being concerned in the shooting.

LAUNCHING A NEW SCHOONER.

The three-masted schooner Laguns was launched yes-terday at Port Jefferson, L. I. The vessel, which is owned by a company of Long Island and New-York people, is 110 feet keel, 140 feet over all, 33 feet beam, 14 feet depth of hold and has a carrying capacity of 800 tons. The schooler cost about \$30,000, and was built for the

Louisiana-Showery, sultry weather has been the rule, in-terfering with harvest of early rice, but greatly favoring growth of bulk of crop, which is late. Estimates of prob-

A SURPRISE IN THE OPENING DAY OF THE BIG TOURNAMENT AT NEWPORT.

newport, R. I., Aug. 18 (Special),-The eleventh annual tournament of the United States National Lawn Tennis Association was begun to-day upon the grounds of the Newport Casino, and society in full force turned out to wirness the play and add a picture-squeness to the score. A beautiful day favored the players, although a brisk breeze bothered them at times. Promptly at 10:30 Dr. James Dwight, the referee, called the roll at the Tennis Building, and started the men in the preliminary round. Of course the big match of the morning was the contest between W. P. Knapp and F. H. Hovey, and every available position of vantage was occupied long before the play began. Both men were it fair condition, and the match was as close as had been expected. The result was a decided surprise, as Knapp was looked upon as a sure winner. Hovey won, but the analysis shows that each man took the same number of games, and Hovey made only four points more than Knapp in a long match of over two hours and Knapp had previously been looked upon as a possible victor of the all-comers', and Hovey's victory will at least put him into the semi-finals.

Hovey started in with the service, and lost the opening set, 6-3. Knapp played his usual safe, sure game, while Hovey was clearly nervous at the Hovey turned the tables on Knapp in the start. exactly the same score, then, to everybody's surprise, he pulled out the third set, after getting a good lead, which Knapp almost made up. The fourth set was easily Knapp's, and both men nerved themselves for the fifth and deciding set. The set was fiercely fought, and Hovey showed much plack and endurance to the close, while Knapp's nerve enabled him to take the match four times when a single point lost would have given Hovey the match. Hovey deserves great credit for his victory, although the match as a whole might be termed slow tennis. Following are the results of the day :

Preliminary round-G. P. Herrick best A. R. Rives, 2. 6-1. 6-0; S. T. Chase best W. B. Lane, 6-1, 6-1, 6-3; R. P. Huntington, jr., beat W. H. Barnes, 6-1, 7-5, 6-2; Hugh Harrison and Daniel Kimball defaulted; 7-5; L. R. Parker beat Stanley Henshaw, 6-1, 6-2, W. 6-3; J. M. Nichols, ir., beat E. M. Church, 6-2, 6-0, No. 6-0; H. G. Bixby beat N. H. Emmons, 6-4, 6-0, 8-6, work

First round-H. A. Colby beat E. K. Rowland, 6-1, 4-6, 6-1, 6-1; F. V. R. Hoppin beat F. J. Benthy by default; Edward L. Hall beat M. Fielding, 6-2, 6-2. Carence Hobart best T. P. Borden, 8-8, 6-3, 6-3; C. M. Bunting best J. A. Hovey, 5-4, 6-8, 4-6, 7-5. Stevens beat B. B. Lamb, 2-6, 6-3, 4-6, 6-2, 6-1; H. G. Bixby heat J. W. Nichols, jr., 6-4, 6-4, 6-1; P. S. Sears beat Deane Miller, 5-7, 6-3, 6-2, 10-8; The course was southeast, one-half south. The W. D. Orcutt beat E. W. Gould, jr., 6-3, 10-8, 6-1; Mineola out-footed the Jessica from the start, though H. I. Wilcox beat W. R. Fowler, 6-4, 2-6, 6-3, 6-4; C. R. Budlong beat F. S. Rushmore 3-5, 6-4, 6-3, 6-2; A. W. Post beat George A. Scott 6-3, 6-3, 6-2; George R. Fearing, ir., beat C. A. Brown 6-0, 6-1, 6-1; M. D. Smith beat Duncan W. Candler 7-5, 6-1, 6-2; 5. F. Brown, ir. beat B. Spalding De Garmendia 6-1, 6-0, 8-6; Burdetta O'Connor beat G. N. Morton 6-0, 7-5, 8-6; P. C. Oscanyan beat Edring Still 6-2, 4-0, 6-4. 6-3; Theodore Horton beat E. A. Thompson 6-2, 6-2, 6-2; J. S. Clark beat E. I. White 6-1, 4-6, 6-1, 6-3; J. H. Hunt heat W. S. Post 6-3, 6-4, 6-1;

Trotter, jr., best A. E. Wright by default. Following is the analysis of the Hovey-Knapp match: Placed balls-Hovey 74, Knapp 45. Aces won on opponent's outs-Hovey 48, Knapp 43. Aces won on opponent's hits into net-Hovey 38, Knapp 59. Aces won on opponent's faults-Hovey 1, Knapp 10. Aces won on service-Hovey 22, Knapp 21. Total points won-Hovey 161, Knapp 157. Total games won-Hovey 24, Knapp 24. Time of match-2:25.

TENNIS AT THE PROSPECT PARK HOTEL Catakill, N. Y., Aug. 18 (Special) .- The second annual open tournament of the Prospect Park Hotel was finished day, with the following result :

Mixed doubles, final round-Miss Sanderson and George Beach beat Miss Beach and Mark Beach, 6-5, 5-6, 6-5. Men's doubles, first round-J. C. Rogerson, jr., and harles Esselstyn, Hudson T. C., beat H. Losee and Elling Charles Esselstyn, Hudson T. C., beat H. Losee and Etting, Red Hook T. C., 6-4, 6-2; Jennings and Van Lose, of Catskill, beat Wynkoop and Wynkoop, of Catskill, 2-0, 6-2, 6-2; Beach and Beach, of Catskill, beat Hopkins and Hopkins, of Catskill, 6-2, 8-0. Second round—Beach and Beach beat Jennings and Van Loan, 6-4, 6-3; Rogerson and Esselstyn a bye. Finals—Rogerson and Esselstyn beat Beach and Beach, 6-2, 6-2.

Men's singles, first round-Elting beat Jennings, 4-6, Sales and Sales Second round-Rogerson best Beach, 6-0, 6-2;

heat Esselstyn, 6-4, 6-0. In the men's singles Regereon, of the Hudson Tennis Club, showed remarkable ability, and will make work for the "cracks" next year. The final between Esselstyn, of the Hudson Club, and Rogerson was one of the finest exhibitions of tennis ever seen along the Upper Hudson.

GRAND ARMY MEN WANT THE LAW OBEYED

THEY WILL TRY TO COMPEL THE CITY AUTHORI-TIES TO APPROPRIATE MONEY FOR A RELIEF FUND.

A special meeting of the Associated Communders and Quartermasters of the G. A. R. Posts of this city was held last evening at the bendquarters of Naval Post, No. 516, in the Essex Market Building. Commander B. S. Osbon, of Naval Post, presided, and Commander James T. Walsh, of Hans Powell Post, No. 638, acted as secretary. Representatives from seventeen city posts were present, as follows: Kultes, No. 32; Ellsworth, No. 07; James Shields, No. 69; Robert Ander son, No. 58; E. A. Kimball, No. 100; Joe Hooker No. 128; Steinwehr, No. 192; Phil Sheridan, No. 238; John A. Andrew, No. 234; Peter Cooper, No. 313; A. S. Williams, No. 394; Fred Hecker, No. 408; General M. Corcoran, No. 427; Volunteer, No. 459; Naval.

Comrade Oabon said that the meeting had been called to take action relating to the enforcement in money needed for the relief of indigent and suffering of the posts. He read the law in question, and also the opinion of Corporation Counsel Clark interpreting its provisions. The Corporation Counsel holds that it is the duty of the Commissioners of the Department of Charities and Correction to include the sums required for the relief of destitute soldiers, sailors and marines and their families in their yearly estimates and certify the same to the Board of Estimate. The latter board having made the necessary appropriation. the officers of the post can draw against it for relief funds. Comrade Osbon detailed the efforts which had been made to induce the authorities to provide the money required by law, their failure and refusal

to resort to legal measures.

Comrade W. J. Nicholson, of A. S. Williams Post, who with Comrade W. C. Reddy, of Hamilton Post, is counsel for the posts, said that a much strenger legal fight was ahead of them than had been expected. This was because the Commissioners of Charittes had taken no steps at all to obey the law and were evidently determined to place all possible obstacles in the way of its enforcement. He and his colleague were already to present the case for judicial action and expect to have the papers served on Wednesday so that argument might be had before a supreme judge the latter part of next week. The first case would be brought in the name of Williams Post on an order to show cause why its relief warrant should not be paid. Counsel would also be ready to seek a mandamus to compel the Charities Commissioners to

Default in fine shape, frequent rains better. Tidewater excellent, but more exposed to damage by storms during harvest.

South Carcina—All the river crops reported in flourishing condition. Copious rains have saved the Cooper River helds, which were in danger from "sail." The labor question is still a serious one, particularly in the phesphate raigions. Early plantings well forward, but rather thin. The latest plantings (June) growing rapidly, and fine latest or Deshets occur, will yield bountfully.

Louislana—Showery, and the raine condition of the Altamaha River the condition. South Carcina and the figures transmitted to the fine as the same for a basis the amounts required for 1891 to would be estimated and the figures transmitted to the condition. Copious rains have saved the Cooper River fields, which were in danger from "sail." The labor question is still a serious one, particularly in the phesphate raining the post officers to send in to secretary Walsh, at the earliest possible moment, the blanks furnished to be filled so as to show the amounts required for 1891 to would be estimated and the figures transmitted to the confidence of the companies of the about post in relief work in the year 1890. With the earliest possible moment, the blanks furnished to efficie so as to show the amounts required for 1891 to efficie so as to show the amounts of the source of the earliest possible moment, the blanks furnished to the earliest possible moment, the blanks furnished to be filled so as to show the amounts required for 1891 to efficie so as to show the amounts of the earliest possible moment, the blanks furnished to be filled so as to show the amounts of the earliest possible moment, the blanks the amounts required for 1891 to efficie so as the source of the earliest possible moment, the blanks the amounts required for 1891 to efficie so as the source of the earliest possible moment, the blanks to show the amounts of the post of the earliest possible moment, the blanks to show the amounts required for 1891 to e

Short's disappearance was singular. At the inquest the exact time when he was last seen was not settled. Dr. Meynen: of Jamaica, testified that he had examined Short's able yield place figures considerably over 1,000,000 sacks.

by rains, being to date 3,235 sacks, as against 23,350 resulted from asphyxiation. William M. Gale told how the body was discovered, and Treadwell Sands told how the body was discovered, and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and Treadwell Sands told how never paid her any salary and had refused to return the body was discovered and the

Augustus Holdridge, the station master at Jamaica said that he was in the habit of walking over the well where Short's body was found about six times a day, and that the well was securely covered. He said that after where Short's body was found about six times a day, and that the well was securely covered. He said that after the pump had been drawn out, an operation in which Short had assisted, he personally attended to having the old well properly covered, and saw that this was dead. He could not tell the exact date of Short's disappearance, but said that it would be shown on the transcript of the parroll which he rendered to the rofiroad company for that week. Coroner Evertit adjourned the inquest until Tuesday at 7:30 n. pr. at the same place. that week. Coroner Everitt adjourned the inquest Tuesday at 7:30 p. m. at the same place.

STRIKING TAILORS NOW DESTITUTE.

MOST OF THEM HAVE LARGE FAMILIES-GEN-ERAL LABOR NEWS.

The families of 120 striking tailors living in Ridge and Attorney sts., the centre of the poorest Hebrew quarters in this city are destitute. These tailors have which little children hunted for morsels of discarded for their more unfortunate comrades and this fund the age. It was the pipe leading from the will be distributed to-day at No. 163 Ridge-st. and voir to the working model that exploded. will give temporary relief.

District Assembly No. 49 held an executive meet-

ing last night at No. 52 Union Square. The principal questions discussed were the best method of stopping the manufacture of shirts in prisons, and the faulty work now being done on the streets in this city. It was asserted that an exceedingly small force of rammermen were employed in Broadway and Third-ave., especially. It is generially being done on the streets and the sugar Couted Sanative Pills. No cases, absolutely painless. At property of the pill doses are usually sufficient. ally the custom for a rammerman to go over a section of ground twice to thoroughly pound the paving stones into place, whereas on the work now being done they only pound the blocks once. The result is that these blocks get loose and the street becomes uneven. William McNair, secretary of District Assembly

49, made a report concerning the tion trip. Among the places he had visited were Shelton, Westerly, New-Haven, Hartford, Albany and Troy. He reports that the district, the jurisdiction of which extends for sixty miles on all sides of the city, is having a boom. According to official figures the membership of District Assembly No. 49 has passed the 60,000 mark.

National Trade District Assembly No. 226, composed of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and conductors in the AMES-On Tuesday, August 18, Robert, eldest son of the union horse-car drivers and the union horse of the union horse-car drivers and conductors in the Linted States, will hold its annual convention in this United States, will hold its annual convention in this city soon. A report was printed recently that District city soon. A report was printed recently that District city soon. A report was printed recently that District on Thursday, August 20, at 1 b. m.

AMES—On Tuesday, Ames Ames, in the last year of Charles 31. and Mary Agnes Ames, in the last this city. It was also printed that District Assembly this city. It was also printed that District Assembles. This was not denied, but it was said that under no circumstances will these local assembles join District Assembly No. 49, for even if District No. 226 trict Assembly No. 49, for even if District No. 226 does give up its charter the local assembles will, it is said, reorganize as independent locals responsible to the said, reorganize as independent locals responsible to the function of the Reformation, Gates-ave, near Franklin-ave., at 2.30 p.m. said, reorganize as independent locals responsible General Assembly of the Knights of Labor alone.

OBITUARY.

SAMUEL EDWIN HISCOX.

the course for twenty-one years, and a warden as two years.

Mr. Rollinson was prominently indentified with Grange, and always took a keen interest in everything that related to that place. He was one of the founders of the Essex County Country Club.

Mr. Rollinson had been ill for a number of months.

Mr. Rollinson had been ill for a number of months.

ROLLINSON—On Monday August 19.

MALCOLM ACKER.

Malcolm Acker, a well-known Yonkers business man, died suddenly at his home in Buena Vista-ave., in that city, on Monday evening from spaems of the heart. Mr. Acker was born in Sing Sing sixty-one years ago, and had been a continuous resident of Yonkers for thirty-five years. He was widely known throughout

WILLIAM M. WEST.

Philadelphia, Aug. 18.—William M. West, ex-City
Solietter, died suddenly to-day at his summer home, at
hadner, Penn., at the age of lifty-one years. Mr. West,
was elected city solicitor on the Republican ticket in
February, 1877, and was re-elected in February, 1881.

DR. JOHN F. S. GRAY.

St. Clair Springs, Mich., Aug. 18.—Dr. John F. S. Gray, a graduate of the Cellege of Physicians and Surgeons, New-York, who formerly practised in New-York City, Paris, Nice and Geneva, died here of Bright's disease to-day. He was the son of the late Dr. John Gray, of New-York.

1,287 Broadway. Miss Mace said that four weeks ago previous day. CORNELIUS VAN COTT, Postmaster. Barker had employed her at a salary of 88 a week as Postoffice, New-York, N. Y., August 14, 1861.

CHARLES E. TRIPLER BADLY INJURED BY THE BURSTING OF A GASPIPE.

Charles E, Tripler, a wealthy inventor, whose home is at No. 40 West Seventy-seventh-st., received serious injuries yesterday at noon by the explosion of a gaspipe in his laboratory at One-hundred-and-seventh-st, and West End-ave. Both arms and one of his thighs were terribly lacerated, and his neck and face wore burned. The building was shattered, and the in the skylight and windows was broken into a thou sand pieces. The explosion was heard by a nur of people in the neighborhood, who upon going to the laboratory found Mr. Tripler in an insensible condition. He soon regained consciousness, and was taken to the home of one of his tenants near by. Physicians were in constant attendance on the injured man yesterday afternoon and last evening, and said that they did not regard his condition as dangerous.

Mr. Tripler has a number of inventious to which he

been on strike for over a month, and nearly all of has devoted the greater part of his life and upon which them have large families. The sidewalk in that district was lined with piles of refuse yesterday, among invention upon which he has been working for several months was an improved gas engine. His work was food. Many of these were the children of the strikers.

The neighbors of the striking tailors have helped them to the laboratory since he began to experiment with Tailors and Coat Makers' Union who are at work have contributed 2.1.2 per cent of their week's earnings for their more unfortunate companies. The contributed 2.1.2 per cent of their week's earnings had about perfected one of the greatest that he and model were blown into many pieces, and con-siderable damage was done to other machinery and tools in the workshop. The building caught fire, but the flames were soon put out.

THE ITALIAN FELLED HIM WITH AN IRON SAR.

Thomas Douglass, a young man whose home was in a Monroe-st. Hoboken, drave a dirt cart to the garbage dump at Canal-st, and the North River at 11 a. m. syesterilary, and was preparing to unload his cart when the lifeling and the proper per curve, and the proper per curve and the pr

systerday, and was preparing to unload his cart when he was told by an Italian, known as Romannica, who was employed there, not to dump his load there. Douglass, nevertheless, was about to pull the side at the front of the cart, when the Italian caught up an iron bar and dealt him a murderous blow on the head. Douglass staggered a few steps and fell headlong off the dump to the garbage scow, thirty feet below. His skull had been fractured by the blow. When a policeman of the steamboat squad was called to the dump Romannica had disappeared. Douglass was carried in an ambulance to st. Vincent's Hospital, and the surgeons there said he would probably die from his injury.

SHE WANIS TO HAVB HER EMPLOYER ARRESTED. Detective Gilin, of the Nineteenth Precinct, accompanied by a young woman, who said she was Celina L. Mace, of No. 329 West Thirty-second-st., applied in the Jefferson Market Police Court for a warrant for the arrest of Johnr H. Barker, a real estate dealer at No. 1,267 Broadway. Miss Mace said that four weeks ago. Rarker had employed her at a salary of 88 a week as processed that four weeks ago. Postoffice, New York, N. Y., August 14, 1801.
